

Collaborative Working Project Executive Summary

Project title	A Collaborative Working Project between University Hospitals Birmingham and Sanofi to support database creation and service improvement in Severe Asthma
Partner organisation/s	University Hospitals Birmingham, Bordesley Green East, Birmingham, B9 5SS Sanofi, 410 Thames Valley Park Drive, Reading, Berkshire, RG6 1PT
Project rationale	<p>The overall aim of University Hospitals Birmingham working in partnership with Sanofi is to improve patient experience and service capacity.</p> <p>The creation and ongoing management of a central database will deliver the following objectives:</p> <ul style="list-style-type: none"> • To establish and maintain biologics database to improve service co-ordination • To ensure consistency in database management within the department that ensures ongoing administration related to the prescribing and monitoring of patients on biologics and transition to homecare • To improve patient experience of the service by reducing patient wait times and providing a more appropriately resourced central point of contact for patient queries • To reduce the administrative burden on clinical staff thereby freeing up clinical capacity to see additional patients • To support improvements in the functioning of the MDT by co-ordinating the MDT. • To utilise findings and outcomes from the project to build a business case to continue the post through NHS funding at the end of the 12 months.
Project period	Quarter 1 2023 – Q1 2024

Project objectives	<p>To create efficiency by developing a database and implementing service recommendations thus supporting Healthcare Professionals' clinical capacity and patient experience.</p> <p>NHS</p> <ul style="list-style-type: none"> • The setup and management of a biologics prescription database to ensure a high quality and accurate database in Severe Asthma. • Increase HCP Clinical capacity and resource efficiency. <p>Patients</p> <ul style="list-style-type: none"> • Improve patient experience of the service by reducing patient wait times and access to biologics <p>Sanofi</p> <ul style="list-style-type: none"> • Increased capacity and higher throughput within the centre, enabling a larger number of qualifying patients to access biologic medicines in line with local and national guidance. • Improved corporate reputation by supporting the NHS provider to improve the quality of care for patients.
